finishing
LYKOR®

manufacturer
ALPAS S.r.l.

N.E.O. means Natural Evolving Object, one of the infinite *macro* perceptions of the reticular structure of matter that it becomes a real three-dimensional object with multiple and 'socially oriented' functions.

The *manifesto* of an innovative polymer resulting from the designer's experience, a leap within the innumerable molecular models that develop during the mutation of matter before it becomes real.

The N.E.O. design is *fluid* as its genesis, which joins the solid state after a dynamic pathway, a *free form* object for a new material: safe, technological, advanced and with a double ECO sustainability (ecological & economical).
