finishing

teak wood / stainless steel

LYKOR® / glass

Otium is an innovative furnishing element conceived to re-design internal spaces and having multiple functions. It can be a suitable support for items to be shown, creating a recognizable environment. Moving every single lateral wing makes possible to reach an unlimited number of configurations, arranging exhibition for goods and suggesting new placement for furniture as armchair or sofa.

Otium is customizable, enabling it to identify common spaces such as lounges or waiting areas with "frame partition".
