finishing
polished lacquer or leather (indoor)
coloured PE (outdoor)

Viewing its configuration, fusillo suggests to seat in front and on the rear, a 'public seating' which can be used in three different positioning on ground. A kind of skin define the form with self-portant structure. Considered a sort of 'modulor', fusillo offers the possibility to be connected with others fusillo becoming 'multiple seating'. Originally thought for interior spaces, will be manufactured also for outdoor areas with roto-moulding technology.
